

Sterile Storage. STAT.

You need it quick, clean, controlled, and secure.

With Spacesaver® healthcare storage solutions, everything's right on hand. Conveniently at your fingertips. Giving you quick, easy access to supplies and materials right at your point of need. You save both steps and time. Deliver care faster and more efficiently. Space management and storage challenges continue to keep healthcare practitioners from doing what they want to do most: spend more quality time with patients. But the trend is soon to be reversed, thanks to breakthrough storage solutions from Spacesaver designed specifically for the healthcare industry.

HEALTHCARE STORAGE | PROCEDURES STORAGE

During surgery, quick, easy access to sterile supplies is critical. Spacesaver's operating room and procedures storage balances environmental control with ready accessibility to keep you operating smoothly — and maximize storage density in your surgical suite.

Spacesaver's durable stationary shelving options are ergonomically designed to improve visibility, accessibility, and organization of sterile supplies in and outside the OR. Glass or Plexiglas doors keep supplies dust free, and allow staff to quickly spot catheters, coronary stints, dressings and other items. Adjustable shelving accommodates changing medical supply packaging sizes.

HEALTHCARE STORAGE | STERILE STORAGE

Spacesaver's efficient, flexible, sterile supplies storage gives you better security and inventory control, too. Conveniently store pre-packed surgical procedure kits, prepared case carts, and sterile bulk materials close to the point of need.

HEALTHCARE STORAGE | STERILE STORAGE

Spacesaver's storage systems, such as FrameWRX® — with wire baskets, are adjustable and re-configurable to accommodate the changing needs of the hospital. Wire shelving within our storage solutions reduces surface area and further enhances infection control. Clear Plexiglas fronted bins make visual location of supplies easier and faster.

HEALTHCARE STORAGE | CONTROLLED CLIMATE

Central Sterile Storage Supply is a core element of the hospital's infection control program. After used - medical supplies are routed through sterile processing, they need to be efficiently stored and easily retrieved on an as needed basis.

HEALTHCARE STORAGE | STERILE STORAGE

Spacesaver's storage systems provide easy, safe and immediate access to stored supplies such as surgical kits. Designed to double the storage capacity of your original space, they hold virtually any type of storage module from wire racks to Plexiglas-fronted bins.
