

INFO SHEET

PharmaStor®

Make the Most of Limited Pharmacy Space, While Improving Work Flow

Spacesaver's PharmaStor® front end storage systems provide instant access to "active" materials and supplies. These mobile storage systems will double your storage capacity in your current space or allow you to store what you now have in 50% less space.

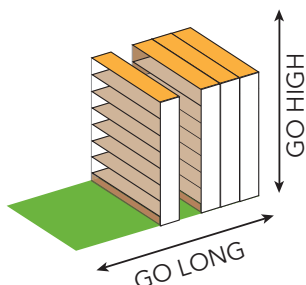

By mounting storage cabinets or shelving on wheeled carriages that travel on rails, wasted space created by fixed aisles can be eliminated, freeing up valuable floor space for other, more productive uses.

PharmaStor's easy access end-of-aisle shelves are ideal for frequently used items. The front end shelves may also be used for daily staging and work in process, reducing aisle activity and creating an organized work flow. Files may be returned to the front end shelves to re-file in batches during periods of low activity.

Flexible interior storage can be designed to hold a variety of package/container sizes and shapes.

FEATURES & BENEFITS

- Modes of Operation - Powered or Mechanical-Assist
- Unlimited Shelving Options
- Ability to Reconfigure & Expand
- Carriage Safety Sweep or Brake
- Safety Locks
- Low Profile Rail Design

Each front end system is specially designed for you; it can be any height, width or depth you desire.

Acrylic bin fronts provide instant recognition of shelf contents. Perfect for bar code labels.

Lockable cabinet doors - can be added for increased protection in exposed aisles, as a complement to a system security lock.

Convenient adjustable shelves can be raised or lowered to easily fit any size materials.

Designed by pharmacists, PharmaStor® is the most efficient pharmaceutical storage system for hospitals, clinics, retail, or laboratories.

The mechanical-assist system features a rotating ergonomic drive handle for ease of use.
